

# The Mobility Cloud

The world's only Platform with its own fleet management software, integrated car and bike sharing solution and vehicle data in real time, through direct connections to the most important vehicle manufacturers.

## The leading cloud software for mobility professionals

AZOWO's cloud software enables companies, cities and municipalities to deliver innovative mobility applications and services in a fast and effective way, and to be ready for the challenges of EV transformation. Live data + plug-and-play software implemented in powerful applications. An all-in-one solution with 100% data protection.

## Opportunities for businesses, cities and municipalities

- Significant cost savings
- New business models and services
- Accelerating the mobility revolution
- Achieving sustainability goals
- Flexible configuration and ease-of-use
- Effective booking algorithm

Hi there!  
I'm Britta Braig

I am your point of contact at AZOWO GmbH for all press, PR and media issues. I coordinate interview- and expert requests, as well as podcast and roundtable participation. Perhaps you or your editors know me from my previous activities at the navigation device manufacturers BECKER and Falk, the Auto Club Europa e.V. or through my work at APCOA Parking Deutschland GmbH and the Automated Valet Parking project together with BOSCH and Mercedes Benz.

I look forward to pursuing a fruitful exchange with you!
