

NEXONIC

DIGITAL SHOPFLOOR MANAGEMENT

NEXONIC

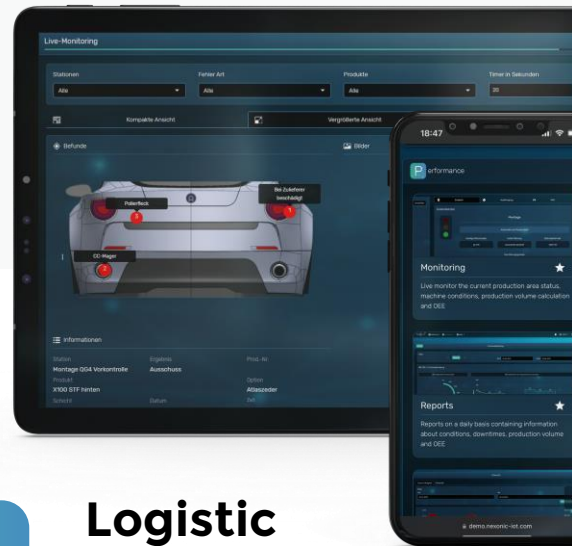

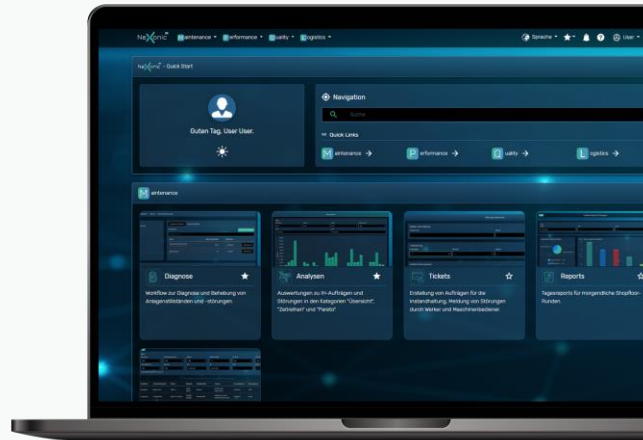

Digital Shopfloor Management

Elevate your production efficiency with NeXonic's advanced cloud-based Digital Shopfloor Management System. Unlock the power of production data and insights across your value chain. Seamlessly connecting your shopfloor to the top floor.

NeXonic empowers your manufacturing journey with tailored digital transformation. Experience real-time insights, transparency and enhanced efficiency. Benefit from simultaneous data capture and evaluation, unrestricted access to key metrics, and in-depth analysis of OEE, fault patterns, and equipment disruptions.

Whether you're a production team member seeking data-driven decision support or a management professional requiring on-the-go performance metrics: NeXonic revolutionizes your manufacturing experience.

The Modularity of Nexonic

Individual or collaboration modules

Quality

Direct error recording including live evaluation and information

Logistic

Transparency of critical inventory, demand & capacity planning

Performance

Real-time KPIs from production through machine integration and sensors.

Energy

Measurement of energy consumption and carbon footprint

Maintenance

Detection of faults and causes with workflow on mobile devices

Check

Standardized check points for product and process topics
